Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty integrating the trained ML model with the Flask application due to mismatched feature encoding	Standardized the preprocessing pipeline and reused the same encoders/scalers in both training and the Flask app
2	Coordinating schedules across team members for daily standups	Agreed on a fixed daily standup time and used a WhatsApp group for quick async updates
3	Initial models showed low prediction accuracy	Performed additional feature engineering and hyperparameter tuning, and adopted XGBoost as the final model
